

**TITLE:** Investment Product Manager  
**LOCATION:** London  
**SALARY:** Competitive  
**REFERENCE** CiPm

Our client is a leading global asset manager and they are looking to recruit an experienced Product Manager to join their team on a permanent basis.

This is a high profile role that is critical given the importance of delivering products in a timely fashion but within a robust governance structure that protects the integrity of the firm as viewed by our regulators, competitors and clients.

**Responsibilities:**

- Provide input and technical advice to the product development team and the product architecture team on the most appropriate product structures and solutions.
- Establish new or changed product structures & solutions.
- Facilitate production of legal documentation.
- Direct the implementation of product change.
- Co-ordinate and maintain fund registrations and listing applications.
- Support the boards of the investment companies or management companies as appropriate.
- Support the strong governance and control framework in place across the company with robust processes and procedures in place to meet all regulatory and statutory obligations.

**Experience:**

- Robust knowledge of the Irish regulatory and corporate environment for investment funds.
- Strong product experience on UCITS funds (including ETFs).
- Good understanding of the portfolio management uses and risks inherent in a wide range of exchange traded and OTC derivatives.
- Excellent communication skills with the ability to build relationships across the business, operations and suppliers at all levels of management up to and including board level.
- Ability to lead and direct change.
- Project Management skills desirable, attention to detail essential.
- Team management experience.

Successful candidates are likely to have worked in the Product Management or the Legal Department of an investment manager, have an in-depth knowledge of investment management, regulatory jurisdictions and the institutional pension fund and private client marketplace. Key personal attributes will also include a high level of intellectual agility and creativity.
